Summary Report
Thirsty Wine

---

1. Product Overview

Product Name: **Thirsty Wine**

The *Thirsty Wine* project is an online platform designed for users to explore, purchase, and learn about various wines. The website features a user-friendly interface with categorized selections such as red, white, and sparkling wines. Each product page offers in-depth details, including wine type, region, flavor profile, and pricing. Users can seamlessly add wines to their cart, review order history, and manage deliveries through their personal accounts.

2. Project Overview

Objective:

The primary objective of this testing initiative was to thoroughly assess and enhance the overall quality and functionality of the *Thirsty Wine* website. Emphasis was placed on evaluating usability, ensuring cross-platform compatibility, and optimizing performance to provide a seamless and intuitive user experience.

Project Deliverables:

Test Summary Report

Bug/Defect Report

3. Testing Approach

Testing Methodologies Implemented:

    Manual Testing

     User Acceptance Testing (UAT)

      Functional Testing

    Compatibility Testing

    Usability Testing

Test Environment:

Browsers: Chrome, Safari, Firefox

Operating Systems: Windows, macOS

Devices: Windows, Mac

---

4. Test Execution Summary.

Total Test Scenarios: 12

Total Test Cases: 101

Passed Test Cases: 70

Failed Test Cases: 31

Identified Bugs: 37

---

5. Project Timeline

Start Date: 04-02-2025

End Date: 10-02-2025

---

6. Conclusion

The testing phase of the *Thirsty Wine* platform was successfully conducted with a focus on verifying core functionalities and improving user experience. Identified defects have been documented and reported for resolution. Further testing and refinements are recommended to enhance system performance before the final release.
